

## Increased Speed and Security for Superior Branch Efficiency

The **MoniSafe 500** teller cash recycler is a powerful solution in the transformation of the retail banking branch channel. The **MoniSafe 500** greatly improves the automation of cash transactions, allowing tellers to provide more customer-centric service and increase cross-selling of bank products and services. Better management of your cash means efficiency, growth and the opportunity to position your branches for the future of retail banking.

### EXTERNAL TRANSIT CASSETTE

Experience a more secure and efficient cash management environment. Cash can be directly loaded from and unloaded to an external transit cassette, decreasing manual cash handling, risk for branch personnel and fraudulent activity. The external cassette may be used to transfer cash to other **MoniSafe 500** and **Monisafe 400** recyclers or Hyosung branch transformation terminals or simply stored in the branch vault for later use.

### SELF-AUDITING

The **MoniSafe 500** provides the option to self-audit its content without the need to physically remove cash from the unit. Cash in each recycling cassette is counted and audited by first moving it to the overflow cassette and then back to the original cassette.

### EFFICIENCY

The **MoniSafe 500** decreases customer wait times and reduces teller counting errors. Buying and selling of cash from the branch vault is minimized, and cash is available at the teller line throughout the day, creating new levels of operational efficiency.

### SPEED AND CONTINUOUS FEED

By virtue of its extraordinary deposit and dispensing speed, the **MoniSafe 500** gets the job done quickly. Continuous feed capability also allows bulk deposit processing with no note limit.

### SECURITY

Serving as a vault, the **MoniSafe 500** boasts one of the largest storage capacities on the market. Intelligent recycling cassettes are housed in a secure safe.

### USABILITY

A touch screen offers unsurpassed convenience and real-time visibility of cash balances. The **MoniSafe 500** can be shared between multiple tellers.

### PRODUCTIVITY

The **MoniSafe 500** dramatically reduces branch start-of-day, end-of-day and balancing procedures. Tellers are ready to work immediately upon branch opening without time-consuming cash handling procedures. Real-time cash verification, auditing on every transaction and end-of-day verification make closing procedures faster and more accurate.

### COMPATABILITY

The **MoniSafe 500** intelligent cassette storage technology allows for internal cassettes to be configured in different combinations, thus accommodating a wide range of branch cash models. Cassettes are interchangeable among other **MoniSafe 500** cash recyclers and other Hyosung branch transformation terminals.

**Teller Cash Recycler with Unprecedented Convenience and Speed**

The **MoniSafe 400A** from Nautilus Hyosung provides enhanced productivity and security in the branch. Simplifying cash transactions, the **MoniSafe 400A** reduces back office cash handling leading to improved service through reduced wait times. Sales performance is enhanced through better interaction between staff and customer.

**EXPERIENCE THE POWER OF CHANGE.**

**UNSURPASSED USABILITY**

- The **MoniSafe 400A** provides real-time visibility to cash levels through an integrated 7" touchscreen. The unit supports multiple tellers simultaneously.

**EASY MAINTENANCE**

- The **MoniSafe 400A** incorporates technology that enables it to clear many jams without human intervention. In the event of failure, the unit is equipped with the ability to illustrate (on a 7" LCD) the point of failure and intuitively lead personnel to the jam. The unit can often be returned to service by the staff rather than relying on specialized service providers.

**MAXIMUM PROTECTION**

- The **MoniSafe 400A** operates with seven secure storage cassettes inside a certified safe. The design significantly reduces cash exposure in comparison to competitive products based on roller storage technology.

**ENHANCED PRODUCTIVITY**

- Advanced cash recycling technology built by Nautilus Hyosung simplifies and accelerates cash transactions, reducing monotonous and repetitive tasks. Reducing cash balancing time helps tellers to focus on customers service and cross-selling.
